# Why Carbon Black?

**Troy Hughes**  
*Associate Software Engineer*

---

“Carbon Black was an exciting change from the standard. People were genuinely excited about what they were doing and wanted to include me. It’s rewarding to come to work everyday with people excited to be here, not just trying to log a 40 hourweek.”

**Madeline Linde**  
*Engineering Intern*

---

“Not only did I learn many new crafts to add to my engineering skillset, but I also felt immediately comfortable with a great group of people. The team pushed me to learn, grow, and progress in the cyber security field. Carbon Black is hard work, but there is definitely time for play. It is the little things you will remember like bagels every Monday, running around Boston with all the interns, and even making mistakes only to watch your fellow coworkers pick you back up.”

**Nick Maresco**  
*Engineering Intern*

---

“This summer internship was invaluable. I learned about technologies that blew my mind from talented engineers. The culture is empowered by its diversely skilled employees.”

**Deanna Dziedzak**  
*Associate Software Engineer*

---

“The fantastic culture at Carbon Black has been evident all the way from my interviews, to my first day, and through the time I’ve worked here. Moving on from college and into the workforce is not the easiest, but having great people and a great work environment has made that transition all the better.”
